My topic: 'Music in life'

Everyone has sometimes a bad day and the only thing you want to do is to hide deep under the coverlet. But there is one solution which perfectly helps, namely music. The happy end energetic one can draw us out of dejection and darkness. Not only does it change the mood but also has a big influence on young people.

First of all, listening to the specific kind of music defines us and tells a lot about who we are. Music has an impact on our style, dressing and even hair colour. From the clothes the person is wearing you can easily guess what kind of music he or she is listening to. Young people also have favourite persons from music and they admire them so badly that they even copy them. It is often a motive to learn to play an instrument, as like their idol.

Furthermore, music connects. People who listen to the same bands and performers share their feelings and thoughts with each other. They go together to the gigs and experience furious emotions. Live concerts gather thousands of youngsters, even though the tickets are expensive.

Taking everything into consideration, music plays a pivotal role in our lives and accompanies it at different times for different reasons. It affects our moods and helps us express our emotions. In my opinion, life without music would be extremely difficult and dull.
